

Morgan Waern Wickström

Programmer

My background is in the hospitality business. I've been working in high end nightclubs and Michelin restaurants as a waiter, bartender, manager and sommelier for the past eleven years.

During these years I have learned to excel at working under high pressure, the importance of attention to detail, how to manage and lead large teams as well as handling conflicts when they occur.

Looking for a change in scenery and new opportunities to grow from, I decided to pursue my other passions in life; games and programming.
